

AREMAC HEAT TREATING EAST, LLC

240 Airport Road
Eastman, GA 31023

Phone: 478.559.1200
<http://aremac.com>

Aremac has been serving the aerospace and commercial manufacturing industries since 1968. We have evolved into a diversified heat-treating facility performing hundreds of processes on virtually every metal imaginable.

WE PROCESS A WIDE RANGE OF COMMERCIAL AND AERSPACE MATERIALS

Aluminum Alloys
Titanium Alloys
Nickel Base Alloys
Beryllium Copper
Mumetal
Brass
Bronze
Oil Hardening Tool Steel
Air Hardening Tool Steel
Hot Work Tool Steel
High Speed Tool Steel
Water Hardening Tool Steel
Plain Carbon Steels
Alloy Steel
Precipitation Hardening Steels
Carburizing Grades
Steel Castings
Ductile Iron
And more ...

Our Specialties

- Straightening of Steel, Aluminum and Titanium
- High Temp Solution Annealing (2100°F) w/Oil Quench
- Age Hardening and Annealing Aluminum 48" X 144"
- Precipitation Hardening (17-4PH, 15-5PH and 13-8MO)
Up to 12FT Random Length bars

Services Available

- Hardening & Tempering
- Nitriding
- Annealing
- Normalizing
- Carbonitriding
- Straightening
- Lab Services
- Solution Heat Treating
- Sub-Zero Treatments
- Carburizing
- Stress Relieving
- Vacuum Heat Treating
- Glass Bead & Sandblasting
- Engineering Evaluation

We have a fully trained and experienced staff including a metallurgical engineer with over 30 years of commercial and aerospace heat treating experience.

At Aremac, we believe that meeting a customer's needs involves both understanding metal processing and a determination to find solutions to problems. Our many years of heat treating experience has equipped us to provide this uniquely different service.

Approvals

Boeing Company • Lockheed Martin

Bombardier • Gulfstream • Many More
